Bug Fixes

Case No.	Description	Fixed In
28-68070	Weekly Booking Chart It was reported that junior students were not highlighted in orange on the Advanced Booking Chart	8.1.0
32-66051	Absence Report – Excel Within the Absence Report it was noticed that if students were not in a class for part of the week or part of their stay, the “non-class days” were showing as ticked in the Excel output when they should have been shown as greyed out.	8.1.0
32-68890	Batch Attendance It was reported that a user with full administrator permissions was not able to change attendance after 24 hrs.	8.1.0
53-69240	User Settings <ul style="list-style-type: none"> - It was noticed that users without full administrator rights were able to override “Passwords Reset Rules” when accessing “User Settings” via the System Settings and the main application - Users (including Administrators) were able to make changes to the user account by accessing the account via the main application. The users (including the Administrator) can now only view the details. - It was reported that the system allowed the creation of new users without checking the “Password Reset Rules” (set within the “System Settings”). These rules are now checked before the new users is saved. - It was noticed that when creating new users the user “Password Defaults” (set within the System Settings) were not defaulted. 	8.1.0
31-66592	Enrolment Analysis Fields It was reported that when the enrolment period had elapsed analysis fields 6-10 were still able to be edited.	8.1.0
31-69090	Misaligned Analysis Buttons It was reported that the Remove button for each of the analysis fields was not aligned.	8.1.0
32-69455	Enrolment Transfer Booking An issue was found with the user’s enrolment transfer permissions. If a user had the “Add” permission but not the “Edit” permission, when they went to add a new transfer the screen was displayed in “View” mode. This has been corrected.	8.1.0
31-69681	Assessment Score on Teacher Portal It was noticed that users could add Assessment Score without having the “Assessment Score Add” permission selected. Now the permission is required to access Assessments within the Teacher Portal.	

Case No.	Description	Fixed In
28-66256	Group Import Even though Dietary Requirements & Medical Notes were separate fields on the Group Import spreadsheet when imported the details were merged in to one field in the student's accommodation record. This is now in two separate fields.	8.0.1
28-68319	Ledger Cash accounting It was reported that a user was getting an error message when running the Ledger Cash Accounting report.	8.0.1
28-68493	Group Maintenance It was reported that the Excel button within the group finance tab was no longer aligned correctly.	8.0.1

Case No.	Description	Fixed In
28-67013	Advanced Timetabling It was reported that a user was unable to copy the first week of a timetable by terms. There was no option to select the term name.	8.0.0
32-67834	Quick Reports – Classing Student Absence was not displaying properly (data was not pulled through) in the Classing Quick Report.	8.0.0
32-67012	Enrolment Transfer Bookings – Times It was reported that when adding AM time in the transfer details (i.e. 08:45), "0" value was automatically removed. This was causing issues when sorting departure times.	8.0.0
53-67831	Price Item – Nominal Codes User was getting an error message when adding an alphanumeric code to a price item.	8.0.0
53-65094	Batch Invoice Re-print – Print Only Option It was reported that even though "Print Only" option was selected the system was still allowing invoices to be emailed out.	8.0.0
31-67621	Host Match Record Users were getting an error message when trying to match host families for students via the quick reports.	8.0.0
31-67237	Edit Enrolment Lockdown It was reported that users were able to cancel an enrolment once it was past the "Days after Departure to Block Booking Amendments".	8.0.0

Case No.	Description	Fixed In
28-64444	Agent & Student Import – SMS Agent Import – Using the option to “Overwrite Matched Records” and with the agent already existing within Class. If the agent within the import file did not have a mobile number but the one within Class did then the import process was removing the mobile number from the original agent record already held. This left the “Send SMS” box ticked but without a mobile number which lead to an error message being displayed: “Mobile Number Required” which stopped the agents record from being imported.	7.13.000
28-65558	Absence Report It was reported that when searching for absence on a student who was assigned to two different courses (different days) the system was not displaying the report.	7.13.000
54-66324	Allocation Detail Edit – Ledger It was reported that a user was getting an error message when trying to allocate a figure near 5 million.	7.13.000
54-65778	Currency – Log Option It has been reported that the “Log” button was not displaying any data.	7.13.000
28-64215	Batch Invoicing – Groups It was noticed that when there was a zero value on the invoice it was showing as a credit not an invoice.	7.13.000
53-64263	Transaction Edit It was noticed that some US schools were at a certain time in the day (after 4pm) adding transactions the date changes to the next day due to them working on the UK server.	7.13.000
32-63264	Enrolment Admission Status – Audit It was reported that when an enrolment status was updated the booking audit became out of sync.	7.13.000

Enhancements / New Features – By Section (Detailed)

058 – Documents – Group Master Document

It is very important that this section is read and actioned.
If not then Group documents could be produced missing some important information.

Issue:

Under certain circumstances when producing a Group merged document student names and their actual bookings details could become out of alignment. This could mean that a student would have another student's booking details displayed alongside it.

An example of this could be if a booking had a cancelled Accommodation Price Item/Booking or excluding Price Items marked as Supplements.

What has been done to resolve this:

After upgrading to Version 8.1.0 the majority of Group Master documents will require some merge fields to be replaced. We can provide you with a new example master template to assist, if you would like a copy please contact Support@infospeed.co.uk.

Group master documents are held within Documents > Group.

Explanations and examples of the enhancements are as follows:

- 1) The following is a view of an example new template. The students' personal details do not need to be amended but Accommodation Price Items, Bookings etc. will need updating. The main change being that an additional occurrence after the field title has been added. There can now be up to three numbers (occurrences) after the field title.

The section boxed in blue will not need updating but the section in red will need changing.

2) **How to use the new merge fields:**

The new merge fields are in various sections and the items below are just an example

An explanation of how the new fields work:

Merge Field	Explanation
Student.intStudent/1	/1 = first student in the list below (Mr R Saviano)
Student.intStudent/2	/2 = second student in the list below (Mr R Saviano/1)

etc.

Merge field [Accommodation-Booking-Host-NonSupplementOnly.txtAddressee/1/2/1] is explained below

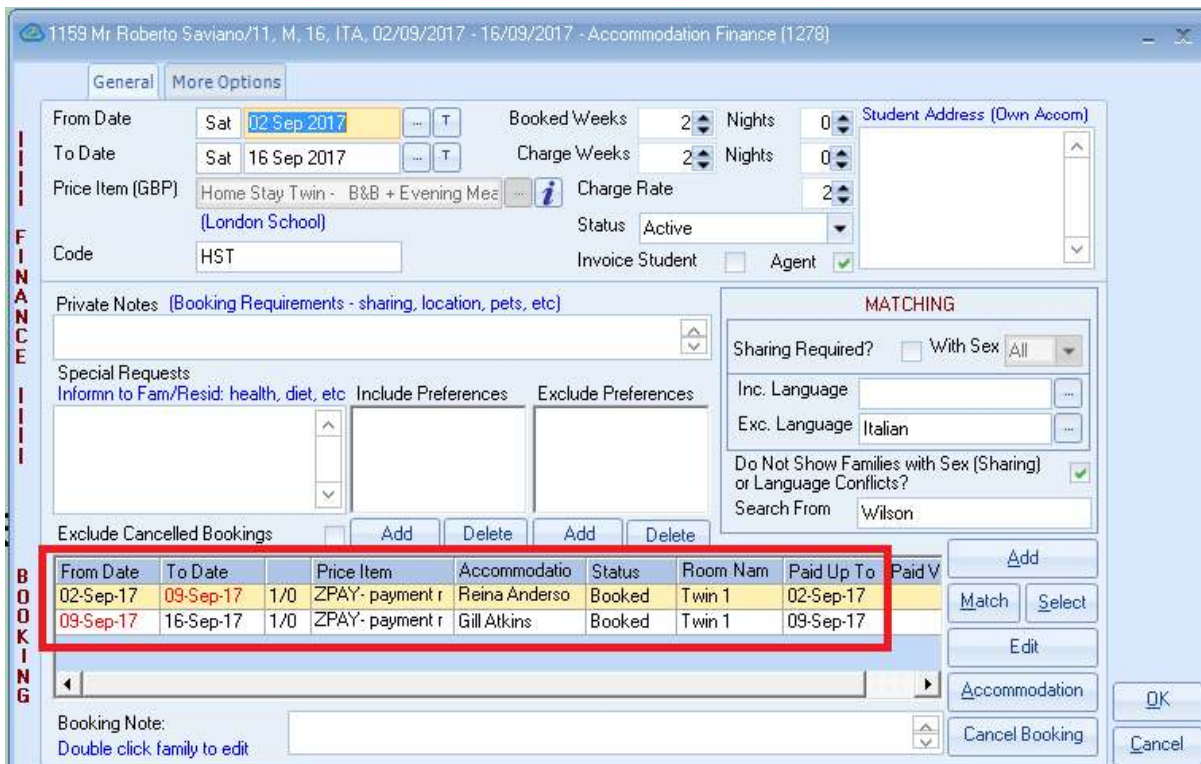

Merge Field Name	Occurrence	Occurrence
[Accommodation-Booking-Host-NonSupplementOnly.txtAddressee/1]	/2	/1
First student in the list	Second Accommodation Price Item on Booking tab	First Accommodation Booking within Price Item

In the following screen shot the Home Stay Twin – B&B + Evening Meal would be the first Accommodation Price Item and Dietary Requirements would be the second Accommodation Price Item.

Categ	Id	Code	Scho	Item	From	To	Dur	S.Wk	Status	
Cours	16	A	GE20	LON	General English 20 lessons	Mon 04/09/2017	Fri 15/09/2017	2/0	2.00	Active

By editing the Home Stay Twin – B&B + Evening Meal (first Price Item), the following screen will be displayed:

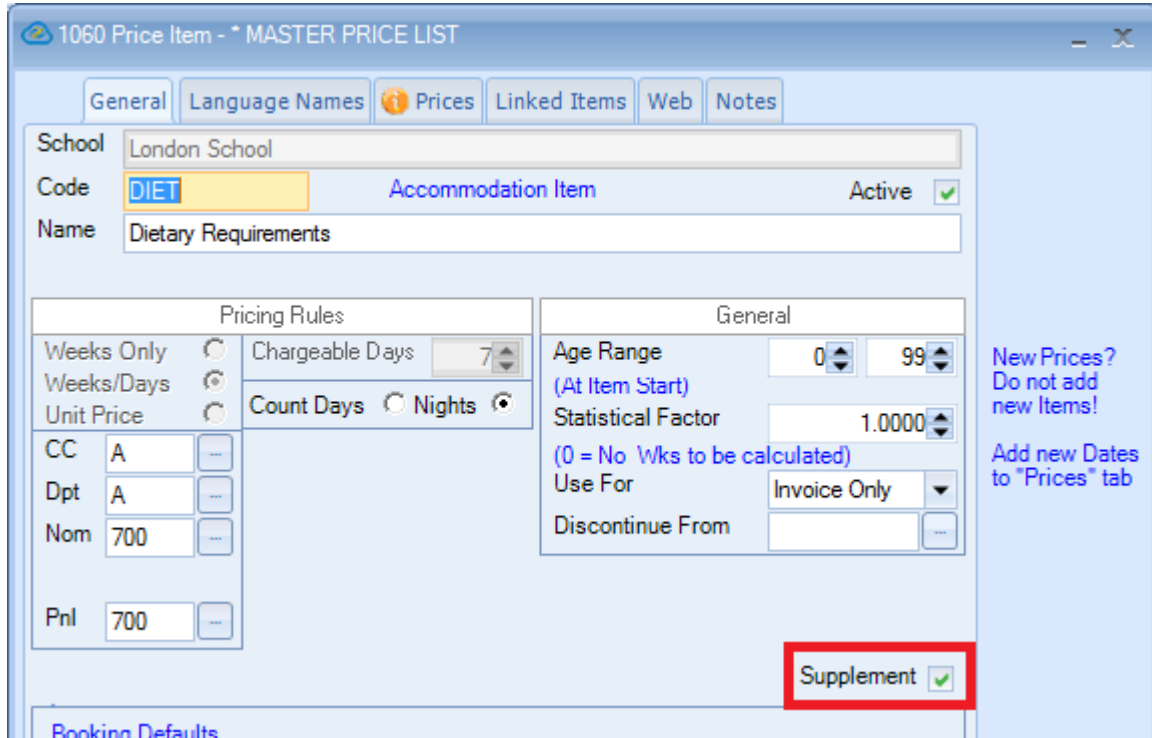

From Date	To Date	Price Item	Accommodatio	Status	Room Nam	Paid Up To	Paid V
02-Sep-17	09-Sep-17	1/0 ZPAY- payment r	Reina Anderso	Booked	Twin 1	02-Sep-17	
09-Sep-17	16-Sep-17	1/0 ZPAY- payment r	Gill Atkins	Booked	Twin 1	09-Sep-17	

The first booking line (Reina Anderson) will be the first Accommodation Price Item, first Accommodation Booking.

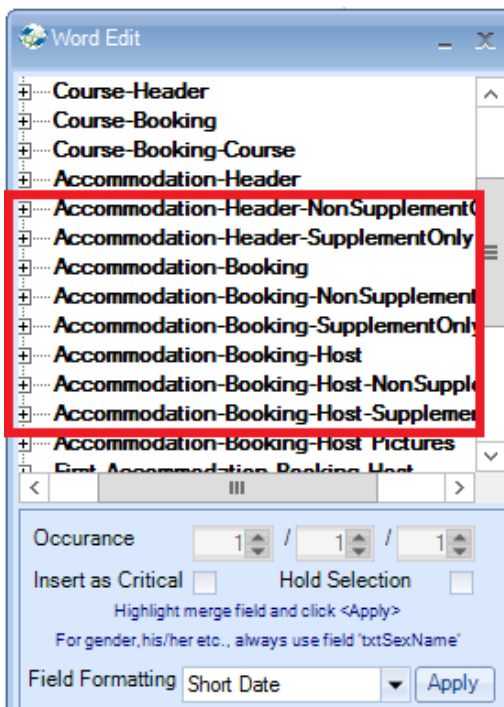

The second booking line (Gill Atkins) will be the first Accommodation Price Item, second Accommodation Booking.

Supplements

A new feature has been added to allow you to include or exclude price items that have been marked as supplements. The screen below shows where the accommodation price item can be marked as a supplement.

New merge fields have been added to accommodate this when creating your master templates.

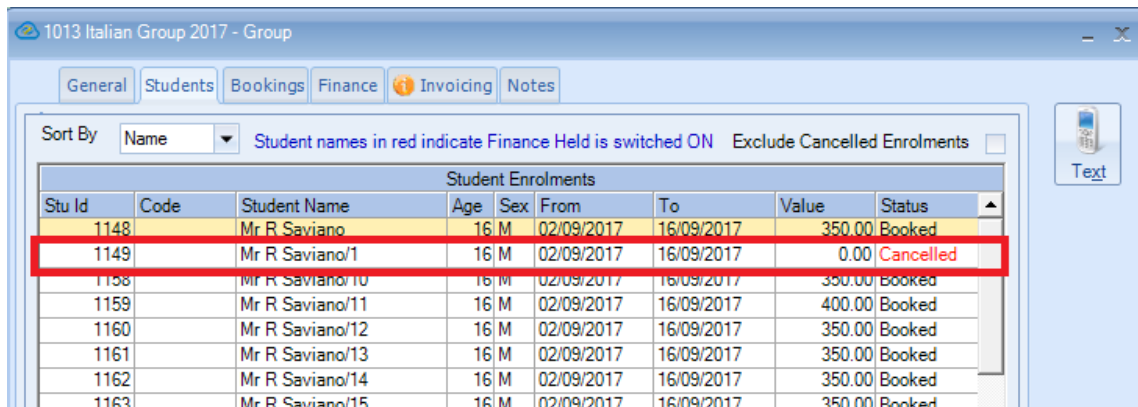

The above fields can also be found within other merge fields sections. An example for the use is as follows:

Non-Supplement – to include only price items that are **not marked** as being a supplement eg. If you charge extra if the family accommodates with dietary requirements.

Supplements only – to include only price items that **are marked** as being a supplement. We suggest that for most documents you will want to use the Non-Supplement merge fields.

Including or excluding cancelled students in the document

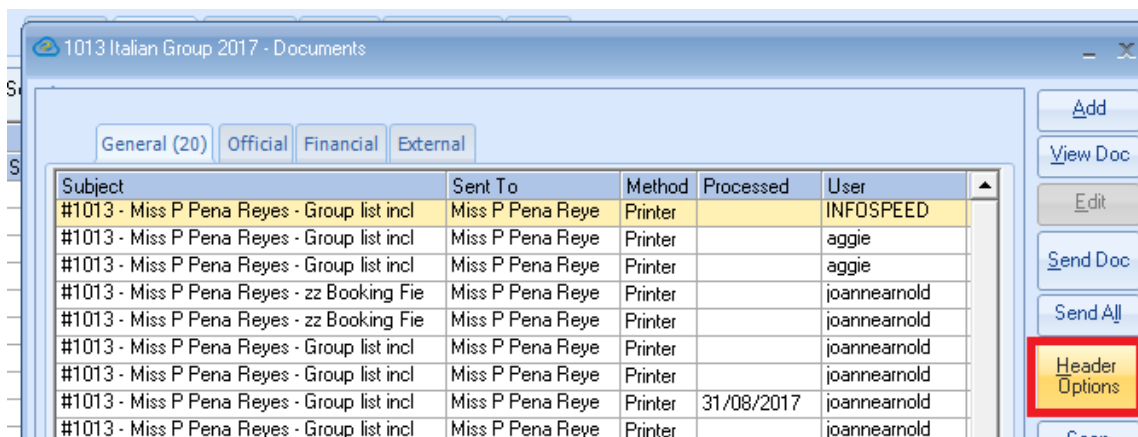

Below is a list of students within a group with the second student being flagged as cancelled.

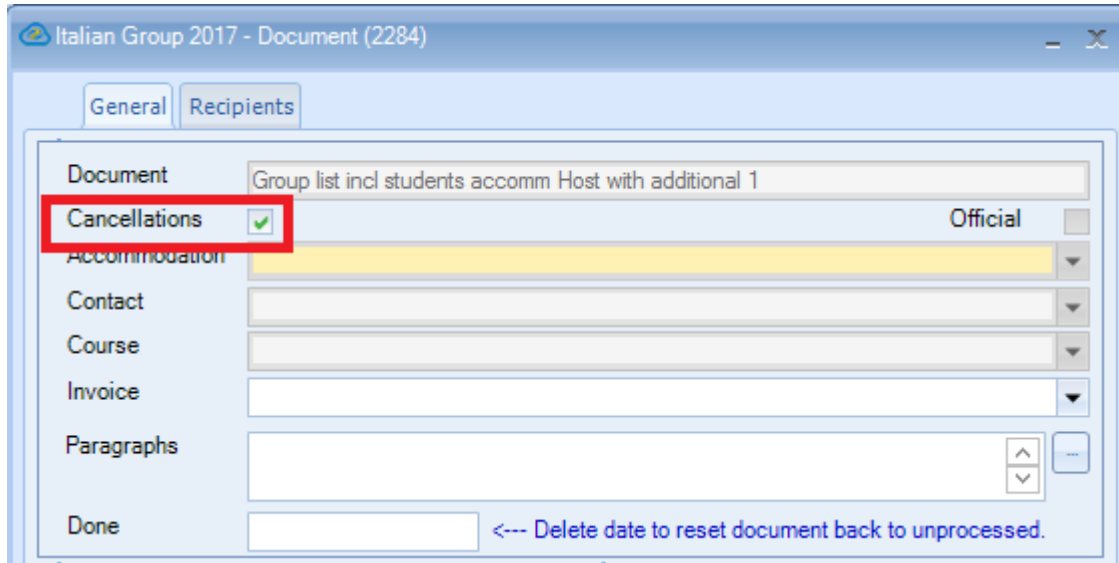

Stu Id	Code	Student Name	Age	Sex	From	To	Value	Status
1148		Mr R Saviano	16	M	02/09/2017	16/09/2017	350.00	Booked

↑ 057 – Student Maintenance – Student Notes Tab

An enhancement has been made to the Student Notes area. A new file path and directory shortcut icon have been added to the Student Notes Tab.

This is allowing users to have direct access to the students' documents (i.e. medical forms, consent letters etc.)

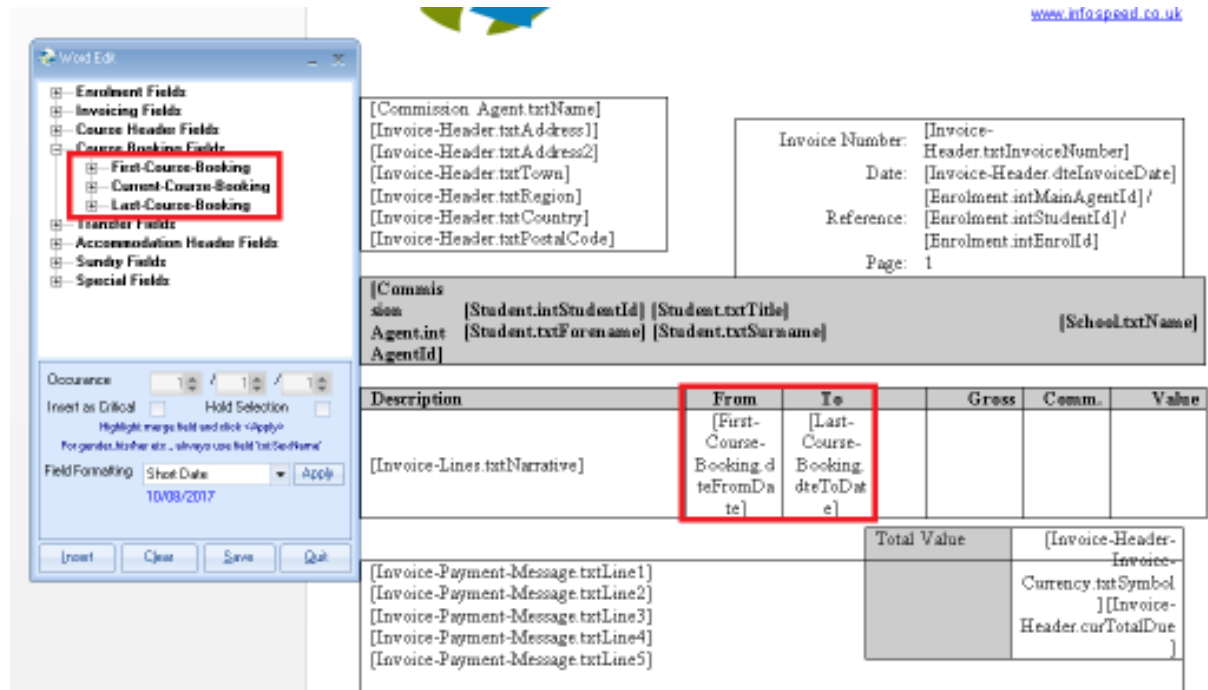

The name of the directory can be changed in the System Settings.

Class Version 7.7.000 and Forwards

Important Information

Please read before upgrading and pass to your IT Technician

Class Version 7.7.000 and all subsequent versions of our software will be running on the Microsoft .NET 4.5.1 Framework.

As a result of this framework change the oldest operating system supported by Class.net is now Windows Vista (Service Pack 2). Windows 2000, Windows XP (All Editions) and Windows Server 2003 (All Editions) are no longer supported.

Any customer that has a requirement to run the Class client on at least one of their computers with an operating system stated above, will not be able to upgrade any further than Class Version 7.6.000

If in doubt, please contact support@infospeed.co.uk for advice.

BEFORE UPGRADING

Please check that you have .NET Framework 4.5.1 installed. Installation files can be downloaded via the Microsoft website:

<https://www.microsoft.com/en-gb/download/details.aspx?id=30653>

All details regarding .NET Framework and specifications for compatible machines / operating systems are included on this page but in summary:

Supported Operating Systems

- Windows Vista SP2 (x86 and x64)
- Windows 7 SP1 (x86 and x64)
- Windows 8 (x86 and x64)
- Windows 8.1 (x86 and x64)
- Windows 10 (x86 and x64)
- Windows Server 2008 R2 SP1 (x64)
- Windows Server 2008 SP2 (x86 and x64)
- Windows Server 2012 (x64)
- Windows Server 2012 R2 (x64)

Backups

Customers are advised to ensure that they have a full back-up of their database prior to this upgrade.

Class Version 7.9.000 and Forwards

Class.net is now available on Windows 10 for both x64 and x86 platforms.

The latest version of Class.net is now compatible with the .net 4.6 (and newer) framework (Minimum requirement .net 4.5.1). It includes additional pre-requisite applications to ensure an easier installation across your business if required components were missing.
